

PRATHAM PATEL

Full Stack MERN Developer

☎ +91-9510043546 ✉ patelpratham580@gmail.com 🔗 linkedin.com/in/prathampatel

Summary

I am a Full Stack Developer with experience in building web applications using the MERN stack and Generative AI. I enjoy solving problems, learning new technologies, and turning ideas into real-world projects. I am particularly interested in backend development, AI-powered applications, and building software that creates value for users.

Skills

Programming Languages: C++, Javascript

Frontend Technologies: HTML, CSS, React, Redux Toolkit, Axios

Backend & Database: Node.js, Express.js, Pinecone, MongoDB, Redis, Mongoose, Cloudinary Storage

Tools & Core Skills: Git, GitHub, Postman, , JWT Authentication

Generative AI: AI Chatbot Development, Embedding , RAG , Langchain

Experience

Prelytix Private Limited

May 2026 - June 2026

Full Stack Web Development Intern

- Engineered scalable full-stack web applications using the MERN stack, focusing on clean architecture, reusable components, and optimized API integration.
- Developed dynamic frontend interfaces with React.js and implemented backend services using Node.js and Express.js for seamless client-server communication.
- Worked on real-world project development involving REST APIs, database management, debugging, version control with Git/GitHub, and performance optimization.

Projects

CodeShastra – AI Powered Coding Platform | *MERN + AI*

- Click here For Visit Codeshastra
- Built a full-stack AI-powered coding platform featuring real-time code execution using Judge0 API, competitive coding contests, and scalable MERN architecture.
- Implemented real-time collaborative coding using WebSockets for synchronized multi-user problem solving.
- Integrated AI-based doubt assistance and video solution support with Cloudinary-powered media management
- Built a scalable admin dashboard for managing coding problems, contests, submissions, and platform content.

RepoMind AI | *MERN, Pinecone, RAG, GitHub API*

- Built an AI-powered GitHub repository assistant using RAG architecture to answer developer queries from repository codebases.
- Integrated GitHub API, vector embeddings, and Pinecone database for semantic code search and intelligent context retrieval.
- Implemented repository indexing, chunking, embedding generation, and AI-based response workflows using Node.js and Express.js.
- Designed a premium full-stack application with React.js, modern UI components, and optimized backend pipelines for scalable multi-repository support.

Achievements

- Internal Hackathon (SIH 2025) : Led a team to develop a blockchain-based supply chain transparency solution, guiding the team through planning, development, and implementation.
- Solved 150+ Data Structures and Algorithms problems on LeetCode and GeeksforGeeks, strengthening problem-solving and coding skills.

Education

B.Tech Information Technology

ADIT College, Anand

GraduateIn: 2027

CGPA: 8.75 / 10
